

COMPANY PROFILE

ABOUT US

Muazzam Electrical Engineering Works that provides a strategic, flexible, experienced and innovative approach to delivering engineering and management consultancy services for its clients.

We have a proven track record in delivering client projects to the most demanding of timescales, within budget and with the lowest possible client risk. This specialist expertise and experience gives our clients the confidence and peace of mind from the outset that their project is in the best possible hands.

All our projects are led by a highly experienced Director and a team with a passion for delivering high quality commercial engineering solutions alongside an excellent level of service. As part of this approach, we focus on designing out systems rather than designing in complex and expensive kit and in seeking to balance the up-front capital cost of equipment and services against the associated life cycle costs of operating the building and provide options based on specific commercial requirements.

Our approach embodies the maximum possible contribution from each of the three pillars of environmental, economic and social sustainability.
